

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

CATALOGUE

Most of the Books of Common Prayer and liturgies in general were printed in black-letter type until the beginning of the eighteenth century. Editions of this character in the following Catalogue are marked "black-letter." When the type is not specified it is understood that the book is printed in roman characters.

By size of page, *e.g.* 6 x 9 inches, is meant the page of type, including running head-lines, footnotes and catchwords, and marginal notes on either side of the text. The measure of the paper is added to designate the exact size of the book.

When pages are not indicated it is understood that the book is printed without pagination. In such instances, however, the number of leaves or of signatures is given in the case of early, rare editions. In all paginated editions the number of pages is stated. When in such editions the introductory section or an appendix is not folioed, the number of pages which it occupies is added in parentheses.

The binding is not mentioned except in the case of early editions, and then only when it is contemporary, or nearly so, with the issue of the book.
